## mitochondrial ATP synthesis coupled electron transport

_					
DUC	loocido	triphoc	nhata n	netabolic	proces
THATE.	IECSILLE		Ullate	4614いいいし	いいいにもうう

electron transport chain

purine ribonucleoside triphosphate metabolic process

respiratory electron transport chain

purine nucleoside triphosphate metabolic process

ribonucleoside monophosphate metabolic process

purine ribonucleoside monophosphate metabolic process

positive regulation of actin filament bundle assembly nucleoside monophosphate metabolic process

ATP synthesis coupled electron transport

/ ATP metabolic process

oxidative phosphorylation

ribonucleoside triphosphate metabolic process

positive regulation of cytoskeleton organization

mitochondrion organization

size

color

20

6e-04

purine ribonucleotide metabolic processirine nucleoside monophosphate metabolic process

positive regulation of supramolecular fiber organization

positive regulation of stress fiber assembly

positive regulation of cell-matrix adhesion

neutrophil degranulation

neutrophil activation

neutrophil mediated immunity

neutrophil activation involved in immune response
